Seattle Community College, 2000

Welding & Metal Fabrication  
Everett Community College, 1998

### *EXPERTISE*

Whole Building Air Barrier Testing  
Field Window Water Testing  
Welding & Metal Fabrication

### *PROFESSIONAL SUMMARY*

Mr. Van Voorst joined BEE Consulting, LLC in July 2015 and currently serves as the Testing Department Manager. In his role, Mr. Van Voorst's responsibilities include overseeing all Air Barrier and Window Testing projects, field project coordination, project plan review, as well as department marketing. Mr. Van Voorst's 15 years of construction experience has left him well versed in procedures and the hands-on happenings of an on-site field representative.

Mr. Van Voorst brings extensive experience in fenestration testing to the role and is an asset to the team.

Prior to Mr. Van Voorst's employment at BEE, he held a position for 9 years at National Certified Testing Laboratories in Everett, WA as the lead field technician coordinating the fenestration testing department. In this role, he performed water leakage field testing, safety glass impact and hurricane force testing. He was also responsible for project bidding, generating field reports and running the field department personnel. Before that, Mr. Van Voorst worked in the field of Metal Fab (Welding), Fire Protection (Pipe Fitting) and as a Carpenter in a contracting division.
