Cement Masonry

### PROFESSIONAL SUMMARY

Mr. Garner joined BEE Consulting, LLC in May 2017 and currently serves as a Testing Technician. In his role, Mr. Garner's responsibilities include completing Air Barrier and Window Testing projects, field project coordination, and project plan review. Mr. Garner's 16+ years of masonry and waterproofing experience has left him well versed in procedures and the hands-on methods of an on-site testing representative.

Mr. Garner brings extensive experience in cement masonry to the role and is an asset to the BEE team.

Prior to Mr. Garner's employment at BEE, he held a position for over 5 years at CNC Diversified in Seattle, WA as the Lead Finisher. In this role, he applied his knowledge of all waterproofing materials and safety requirements. He was also responsible for managing the crews and projects, as well as material, labor, and costs. Before that, Mr. Garner worked as the Lead Finisher for American Protective Coatings in Seattle, WA in charge of their customer relations, and hiring and training the crews. He managed their materials costs and labor, and was in charge of all finishing and installing all waterproofing and flooring.
