Asbestos Worker Class 3, Operations and  
Maintenance  
Lead Safe Renovation Contractor  
Automotive Restoration/Customization  
Electronics: Components and Kit Assembly

### PROFESSIONAL SUMMARY

Mr. Welch joined BEE Consulting in February of 2022 as a Project Inspector. As a Project Inspector, Mr. Welch inspects buildings for compliance to codes in regard to building envelope waterproofing and provides the client with an inspection report of his findings and recommendations.

Before joining BEE, Mr. Welch worked at the University of Portland as a Carpenter. In this role, he managed the carpentry related needs of campus facilities. This included leak repairs after heavy rains, tracking time and materials with the university's TMA/MMS system, working in conjunction with other departments to accomplish joint projects, prioritizing the carpentry projects, and organizing and managing student workers involved in the carpentry projects.

Prior to working at the University, Mr. Welch was a self-employed Contractor specializing in custom home remodels. This allowed him the freedom to suggest and implement new procedures for cutting labor time and improving efficiency with his clients, as well as utilize his organizational and management skills while managing laborers to keep focused and on task.

Mr. Welch's diverse wealth of knowledge is a welcome addition to BEE Consulting.
