Project Management
Digital Art

PROFESSIONAL SUMMARY

Mr. Degenstein joined BEE Consulting, LLC in June of 2022 as a Drafter in our Design Drafting Department in our Portland Office. As part of the team, he manages multiple projects, creating detail drawings and designs of building envelope details for residential, and commercial projects.

Prior to BEE Consulting, Mr. Degenstein worked as an Assistant Designer for Cielo Home and Design. As their only full-time employee, he managed a lot of responsibilities and details for them, including creating the majority of all CAD models and construction drawings, dealing with all vendors/clients/contractors, scheduling all appointments and managing the furniture/antique shop.

Mr. Degenstein has also been a Freelance Designer for Barbie Palomino in Los Angeles, California. There he worked on completely renovating a single two-story home as her only CAD modeler, using Photoshop for renderings and Illustrator to recreate extremely old original plans.
